

table of contents

Executive Summary	1
Key Terms	5
Suggested Checklist for Governments on How to Prepare for Climate Change	7
Chapter 1 Take Action, Take Advantage: An Introduction by King County Executive Ron Sims	9
Chapter 2 A Scientific Overview of Climate Change and Its Impacts	15
2.1 A Brief Overview of Climate Change.....	15
2.2 How Warm Will The World Get?	17
2.3 Projected National and Regional Consequences of Climate Change	20
Chapter 3 The Case for Governments to Prepare for Climate Change	25
3.1 Why Governments Cannot Wait	25
3.2 Reasons for Local, Regional and State Governments to Be Proactive.....	26
3.3 Moving Beyond Common “Barriers”	28
Chapter 4 Scope the Climate Change Impacts to Your Major Sectors	33
4.1 Collect and Review Important Climate Information.....	33
4.1.1 Information Sources.....	33
4.1.2 How is Climate Expected to Change in Your Region?	35
4.1.3 What are the Projected Impacts of Climate Change in Your Region?.....	40
4.1.4 How to Work with Little Information.....	43
4.2 What Will Your Level of Commitment Be?.....	44
Chapter 5 Build and Maintain Support to Prepare for Climate Change	47
5.1 Identify or Cultivate a “Champion” for Preparedness.....	47
5.2 Identify and Understand Your Audience for Outreach	48
5.3 Develop a Preparedness Message.....	49
5.4 Spread the Message.....	51
Chapter 6 Build Your Climate Change Preparedness Team	55
6.1 Why to Form a Team.....	55
6.2 How to Select Members for Your Team.....	56
6.3 How to Select a Team Leader.....	59
6.4 What the Team Will Do	60
6.5 How to Make Progress with Limited Resources: Assign a Point Person	61
Chapter 7 Identify Your Planning Areas Relevant to Climate Change	65
Chapter 8 Conduct a Climate Change Vulnerability Assessment	67
8.1 Review and Supplement Important Climate Information	67
8.2 Conduct Your Climate Sensitivity Analysis	68
8.2.1 Questions to Help You Analyze Degree of Sensitivity	69
8.2.2 Working with Limited Resources: Combining Resources	71
8.3 Evaluate the Adaptive Capacity Associated with Systems in Your Planning Areas.....	78
8.4 Completing the Assessment: How Vulnerable Are You to Climate Change?	83

Chapter 9 Conduct a Climate Change Risk Assessment.....	87
9.1 Assess Your Climate Change Risks.....	87
9.2 Establish Your List of Priority Planning Areas.....	90
Chapter 10 Set Preparedness Goals and Develop Your Preparedness Plan.....	93
10.1 Establish a Vision and Guiding Principles for a Climate Resilient Community.....	93
10.2 Set Preparedness Goals.....	95
10.3 Identify Potential Preparedness Actions.....	97
10.4 Select and Prioritize Preparedness Actions.....	105
Chapter 11 Implement Your Preparedness Plan.....	109
11.1 Ensure that You Have the Right Implementation Tools.....	109
11.2 Manage Uncertainty and Risk.....	110
Chapter 12 Measure Your Progress and Update Your Plan.....	113
12.1 Measure Your Progress.....	113
12.2 Review Your Assumptions.....	117
12.3 Update Your Plans.....	118
12.4 Share Your Learning.....	119
Chapter 13 Taking the Long View: Final Thoughts on Preparing for Climate Change.....	121
Chapter 14 Sources.....	123
Appendix A. Summary of Observed Changes in the United States.....	129
Appendix B. Climate Change Impacts Science Primer.....	133
Appendix C. U.S. National Assessment Regional Summaries.....	137
Appendix D. Sources of Information on Climate Change Science, Impacts, and Adaptation.....	147

Figures

Figure 2.1	Illustration of the Greenhouse Effect	16
Figure 2.2	Changes in the Atmospheric Concentration of Three Important Greenhouse Gases.....	18
Figure 2.3	Rapid Changes in Glaciers Reveal the Impact of 20th Century Warming.	19
Figure 2.4	Global Temperature Projections for the 21st Century.....	21
Figure 2.5	Mega Regions Analyzed in the U.S. National Assessment	23
Figure 8.1	Recent and Projected Average August Surface Air Temperature in the Columbia River Basin, Compared to Temperature Thresholds for Local Salmon Populations	72
Figure 8.2	Watersheds Participating in a Regional Water Supply Planning Process for the Central Puget Sound Region of Washington State	73
Figure 8.3	Inundation Levels in the City of Olympia, Washington, from Current and Projected Changes in High Tides.....	86
Figure 9.1	Sample Vulnerability-risk Matrix for Identifying Priority Planning Areas.....	91
Figure B.1	Climate Change Impacts Science Primer: How Do Scientists Project Future Climate and Its Impact on Local Resources?	133
Figure D.5.1	Currently Funded Regional Integrated Sciences and Assessment (RISA) Teams...	171

Tables

Table 2.1	Changes in greenhouse gas concentrations between 1750 (the start of the Industrial Age) and 2005.....	15
Table 3.1	Examples of greenhouse gas lifetimes.....	26
Table 4.1	Sample summary table for projected regional climate change.....	38
Table 4.2	Sample of sectors and potential climate change impacts.....	40
Table 6.1	Potential participants in a climate change preparedness team.....	57
Table 7.1	Current and expected stresses to systems in sample planning areas of water supply, stormwater management, and road operations and maintenance.....	66
Table 8.1	Climate change sensitivity analysis for systems in sample planning areas of water supply, stormwater management, and road operations and maintenance.	74
Table 8.2	Evaluation of adaptive capacity in systems associated with sample planning areas of water supply, stormwater management, and road operations and maintenance.	81
Table 8.3	Vulnerability assessment for systems associated with sample planning areas of water supply, stormwater management, and road operations and maintenance.....	84
Table 9.1	Qualitative risk assessment for systems associated with the sample planning areas of water supply, stormwater management, and road operations and maintenance	89
Table 10.1	Sample climate change preparedness goals and actions.....	101
Table A.1	Summary of observed changes in the United States	129
Table D.2	Institutional sources of information on climate change science, impacts, and adaptation	149
Table D.3	Sources of information on climate change science	155
Table D.4	Publications on climate change impacts and adaptation.....	159
Table D.5.1	Regional Integrated Sciences and Assessments (RISA) Program Teams	172

Boxes

Box 2.1	Who is the Intergovernmental Panel on Climate Change (IPCC)?	17
Box 2.2	What Is the Difference between Climate Projections and Climate Predictions?.....	20
Box 3.1	Examples of Early Preparedness Efforts.....	32
Box 4.1	I'm Not an Expert. How Can I Evaluate the Credibility of a Source?.....	34
Box 5.1	“The Future Ain't What It Used to Be: Planning for Climate Disruption” – The King County Climate Change Conference	52
Box 6.1	Questions to Consider When Establishing a Climate Change Preparedness Team.....	56
Box 6.2	Tips for Selecting Science Advisors	58
Box 6.3	Case Study: King County's Climate Change Preparedness Teams	62
Box 8.1	Issues to Consider When Beginning a Vulnerability Assessment	68
Box 8.2	Addressing Climate Change in a Regional Water Supply Planning Process in the Central Puget Sound Region of Washington State	73
Box 8.3	King County Questionnaire for Preliminary Assessment of Climate Change Impacts and Adaptation Barriers	82
Box 8.4	Case study: Assessing Vulnerability to Sea Level Rise in the City of Olympia, Washington	85
Box 9.1	Risk Perception and Risk Tolerance	88
Box 10.1	Illustrations of Climate Change Preparedness Goals	96
Box 10.2	Adapting to Climate Change: Lessons for London	100
Box 11.1	Common Implementation Tools for Climate Change Preparedness Actions	109
